Vista Engineering Technologies Expands Business Focus

Richland, WA -- Vista Engineering Technologies, LLC (VET) recently hired KC Kuykendall to launch a new engineering and consulting service offering targeting sustainability and renewable energy initiatives.

Kuykendall has over twenty years of corporate leadership experience, spanning the high-tech manufacturing, sustainable design and development, green-building and energy industries for domestic and international interests. Many of his accomplishments address the political landscape and sustainable policy development for industry and community health.

“Vista Engineering has committed to the development of this business sector and we are targeting significant growth as a result of this strategic expansion of services. KC is an expert in these fields and we are proud to have him on board,” VET President Phil Ohl commented.

Vista Engineering Technologies is headquartered in Richland. Vista has earned an expert reputation in a wide variety of technical fields spanning the defense and energy industries, and natural resource management. More than eighty professionals on staff include environmental, mechanical, civil, chemical, electrical, materials, and nuclear engineers and scientists with advanced degrees, professional licenses, and certifications.
